BIOLOGY(Theory) **Paper 1**

NOVEMBER 2023

1 hours

### INSTRUCTIONS.

- **This paper consists of two sections A and B.**
- **Attempt all questions.**

1.Uganda dentists' association conducted a survey about the **oral hygiene of pupils in primary schools in Uganda** from march to May 2023.In their studies, they found out that most of the pupils in classes from P.1 to P.4 had poor oral health characterized by the pupils having **bleeding gums, tooth ache, dental decay and formation of pus around the base of their teeth** as well as **bad smells** of their mouth.

As such the head teacher of your former school has organized a **one-day health talk** for the school and one of the items on the programme list is **maintaining good oral hygiene.**

**Support material**

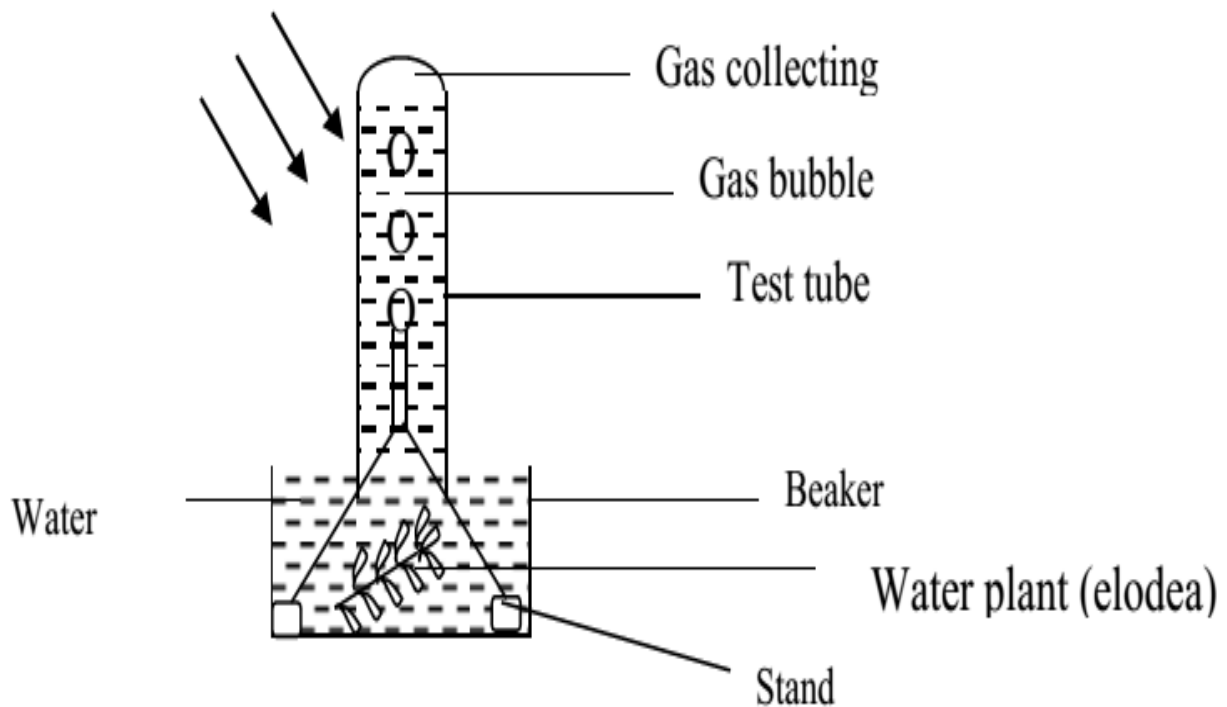

Figure: *some of problems faced by the pupils*

### Task

You have invited by the head teacher to facilitate this session on the programme. Prepare **a speech** that you will use to educate these pupils about **the maintenance of good oral hygiene**.

**2.photosynthesis is the process by which green plants make starch.write an article to you fried describing how the starch can be tested.**
